Environmental action plan is the first step in coordinating and managing all our actions that impact on environment. It is a part of a wide ranging program for the development and implementation of environmental policy involving all **COMPANY NAME** corporate office and workplace. The plan should be seen in the context of the organization's environmental strategy, and will contribute to the development of environment. The environment in which people live has a major effect on their health.

The plan therefore examines the main environmental and health impacts of **COMPANY NAME** activities and sets out specific actions to deal with these impacts

5. These actions cover six areas:

- A) Air quality
- B) Energy
- C) Ambient noise
- D) Open Space and biodiversity
- E) Waste
- F) Health

Setting targets in each. The plan both reflects and will inform **COMPANY NAME** business planning process and adopts the same, though many of the actions are ongoing or may take longer to complete. It will be reviewed annually **COMPANY NAME** will carry out its business in a responsible way and aim to ensure that the social, economic and environmental strands of the concept of sustainable development are an integral part of the decision making processes across the organization.

In line with strategy, organization will aim to “to reduce the health and environmental damage by **COMPANY NAME** activities” However; organization’s policy gives a clear lead in committing the organization to the principle of sustainable development. Sustainable Development has been defined as ‘development which meets the needs of the present without compromising the ability of future generations to meet their own needs.

To achieve this, economic development must go hand in hand with environmental improvement and social inclusion. That is why **COMPANY NAME** has produced an Environment Action Plan and Occupational Health & Safety Policy to sit alongside **COMPANY NAME** Business Plan in aiming to meet the sustainable development agenda.
